

Security Control Hub

Fortify your defenses with clear compliance insights.

Simplify compliance management and eliminate guesswork with the Security Control Hub. Secure data management mapped to recognised security frameworks using Power BI and SharePoint for clear visibility and audit-ready documentation.

Cost Effective Compliance

Annual subscription provides continuous updates to policy templates and security frameworks.

Simplified Management

Track compliance in real-time with live Power BI dashboards.

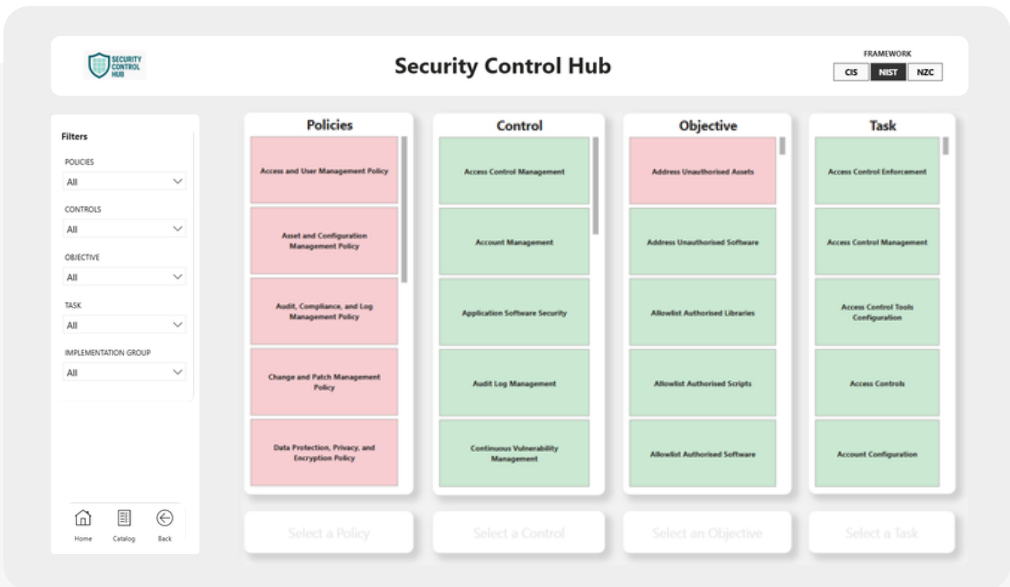

Centralised Security

Configure role-based access controls within Microsoft 365.

Paying more than you should for cyber insurance?

Insurers reward businesses that can prove active security governance and risk reduction. Security Control Hub provides clear documentation of your compliance efforts to support lower insurance premiums and strengthened claims positioning.

Complete Traceability

Never lose track of a policy or task again, with full visibility into completion status for continuous improvement.

Centralised Control

Eliminate scattered documents and spreadsheets with a single, streamlined interface for all policies, tasks, and framework mappings.

Secure Access

Ensure data integrity and control by assigning secure, role-based access to compliance tasks and information.

Real-Time Insight

Get a clear, real-time view of your compliance posture with intuitive dashboards that show you exactly where to focus.

Seamless M365 Integration

Keep complete control and data sovereignty by storing all information securely within your own Microsoft environment.

Effortless Audit Readiness

Be prepared for any audit with automated, evidence-ready documentation that simplifies the entire process.

Aligned to Global Standards

Whether you need advanced CIS compliance tracking or a practical CERT NZ-aligned solution, this fully integrated system ensures comprehensive security management, improved compliance oversight, and reduced risk. Aligned to global and regional frameworks including CIS Controls, NIST CSF, and CERT NZ Critical Controls..

Maps policies and tasks against the comprehensive CIS Security Controls framework.

Suitable for organisations with advanced security and compliance requirements, and available technical resource.

Cert NZ Critical Controls provide foundational security recommendations, designed for New Zealand's environment.

An accessible starting point, ideal for organisations looking for practical, foundational security controls.
